

Oral Healthcare Guidelines Literature Review

The literature review was restricted to:

- Research from within the UK
- Undertaken in the last decade
- Limited to English only

This was obtained by searching Medline, Pubmed, and Cochrane databases, and was supplemented by specific trawling of the Journal of the British Society of Gerodontology. Strategic documents and standards documents were also reviewed to inform the development of these guidelines.

The limited local information available regarding provision of dental treatment to older adults in Northern Ireland has also been examined.
