**Unannounced Medicines Management Inspection
of
Bangor – Bloomfield Suite**

17 April 2015

The Regulation and Quality Improvement Authority
9th Floor Riverside Tower, 5 Lanyon Place, Belfast, BT1 3BT
Tel: 028 9051 7500 Fax: 028 9051 7501 Web: www.rqia.org.uk

1. Summary of Inspection

An unannounced medicine management inspection took place on 17 April 2015 from 10:45 to 12:15.

Overall on the day of the inspection the management of medicines was found to be safe, effective and compassionate. The outcome of the inspection found no significant areas of concern though some areas for improvement were identified and are set out in the quality improvement plan (QIP) within this report.

Recommendations made as a result of this inspection relate to the DHSSPS Care Standards for Nursing Homes, April 2015. Recommendations made prior to April 2015 relate to DHSSPS Nursing Homes Minimum Standards, February 2008. RQIA will continue to monitor any recommendations made under the 2008 standards until compliance is achieved. Please also refer to sections 5.2 and 6.2 of this report.

This inspection was underpinned by the Department of Health, Social Services and Public Safety (DHSSPS) Care Standards for Nursing Homes (2015)

1.1 Actions/Enforcement Taken Following the Last Inspection

Other than those actions detailed in the QIP there were no further actions required to be taken following the last inspection on 7 January 2013.

1.2 Actions/Enforcement Resulting from this Inspection

Enforcement action did not result from the findings of this inspection.

1.3 Inspection Outcome

	Requirements	Recommendations
Total number of requirements and recommendations made at this inspection	0	2

The details of the QIP within this report were discussed with Ms Donna Mawhinney, Registered Manager, as part of the inspection process. The timescales for completion commence from the date of inspection.

2. Service Details

Registered Organisation/Registered Person: Four Seasons Health Care Dr Maureen Claire Royson	Registered Manager Ms Donna Mawhinney
Person in Charge of the Home at the Time of Inspection: Ms Donna Mawhinney	Date Manager Registered: 30 December 2014
Categories of Care: NH-LD, NH-LD(E)	Number of Registered Places: 17
Number of Patients Accommodated on Day of Inspection: 16	Weekly Tariff at Time of Inspection: £593

3. Inspection Focus

The inspection sought to assess progress with the issues raised during and since the last medicines management inspection, to determine if the following standards and themes have been met:

Standard 28: Management of Medicines
Standard 29: Medicines Records
Standard 31: Controlled Drugs

Theme 1: Medicines prescribed on a “when required” basis for the management of distressed reactions are administered and managed appropriately.
Theme 2: Medicines prescribed for the management of pain are administered and managed appropriately.

4. Methods/Process

Specific methods/processes used in this inspection include the following:

Prior to the inspection, the inspector reviewed the management of medicine related incidents reported to RQIA since the last medicines management inspection.

During the inspection, the inspector met with the registered manager and staff on duty.

Samples of the following records were examined during the inspection;

Medicines requested and received	Medicine audits
Personal medication records	Policies and procedures
Medicines administration records (MARs)	Care plans
Medicines disposed of or transferred	Training records
Controlled drug record book	

5. The Inspection

5.1 Review of Requirements and Recommendations from the Previous Inspection

The previous inspection of the home was an unannounced care inspection dated 24 September 2014. The completed QIP was returned and approved by the care inspector.

5.2 Review of Requirements and Recommendations from the Last Medicines Management Inspection

Last Inspection Statutory Requirements		Validation of Compliance
Requirement 1 Ref: Regulation 13(4)	The registered manager must investigate the apparent discrepancy in the administration of alendronic acid tablets. A report of the findings and action taken to prevent a recurrence must be forwarded to RQIA.	Met
	Action taken as confirmed during the inspection: This investigation was completed as required.	
Requirement 2 Ref: Regulation 13(4)	The registered manager must ensure that the refrigerator thermometer is reset each day after the maximum, minimum and current temperatures have been recorded.	Met
	Action taken as confirmed during the inspection: The refrigerator temperature is monitored and recorded on most days. There was evidence that the thermometer is reset after the reading is taken.	

Last Inspection Recommendations		Validation of Compliance
Recommendation 1 Ref: Standard 37	Obsolete personal medication records should be cancelled and archived.	Met
	Action taken as confirmed during the inspection: Obsolete personal medication records had been removed from the medicines file and archived.	
Recommendation 2 Ref: Standard 38	Two nurses should verify and sign all hand-written updates on the medication administration records.	Met
	Action taken as confirmed during the inspection: This was observed to be routine practice.	
Recommendation 3 Ref: Standard 38	The time recorded for the administration of bisphosphonate medicines should be accurately recorded.	Not Met
	Action taken as confirmed during the inspection: Bisphosphonates are recorded as administered on the MARs at the same time as the other morning medicines. The registered manager advised that they were administered 30 minutes before the morning medicines. This recommendation has been restated	
Recommendation 4 Ref: Standard 39	The registered manager should ensure that a risk assessment is in place for the storage of emollient preparations in patients' bedrooms.	Met
	Action taken as confirmed during the inspection: Risk assessments have been completed and were observed during this inspection.	

5.3 The Management of Medicines

Is Care Safe? (Quality of Life)

Medicines are being administered in accordance with the prescribers' instructions. The audit trails performed on a variety of randomly selected medicines produced satisfactory outcomes.

Systems are in place to manage the ordering of prescribed medicines to ensure adequate supplies are available and to prevent wastage.

There are robust incident reporting systems in place for identifying, recording, reporting, analysing and learning from adverse incidents and near misses involving medicines and medicinal products.

Medicine records were legible and accurately maintained to ensure that there is a clear audit trail. The good practice of two registered nurses initialling handwritten entries on the personal medication records, in the absence of the prescriber's signature, was acknowledged.

Disposal of medicines no longer required is undertaken by trained and competent staff. Any discontinued or expired medicines are discarded by two registered nurses into the pharmaceutical clinical waste bin.

The receipt, administration and disposal of all controlled drugs subject to record keeping requirements are maintained in a controlled drug record book.

Stock balances of controlled drugs which are subject to safe custody requirements are reconciled on each occasion when the responsibility for safe custody is transferred.

Is Care Effective? (Quality of Management)

Written policies and procedures for the management of medicines are in place. There are Standard Operating Procedures (SOPs) for the management of controlled drugs.

Suitable arrangements are in place for the registered manager to ensure that the management of medicines is undertaken by qualified, trained and competent staff and systems are in place to review staff competency in the management of medicines. A record is maintained of the staff medicines management training and development activities. An annual capability and competency assessment is carried out on each registered nurse. A sample of records was provided for inspection.

There are robust arrangements in place to audit all aspects of the management of medicines. A medicines audit is carried out by the registered manager on a monthly basis and she advised that the findings, along with any actions required, are communicated to staff. Copies of these audits were available for inspection. There are also daily audits and running stock balances completed by the registered nurses.

Is Care Compassionate? (Quality of Care)

The records of two patients who were prescribed an anxiolytic medicine for administration on a “when required” basis in the management of distressed reactions was examined. The medicine records were legibly and accurately maintained to ensure that there is a clear audit trail. The parameters for administration were recorded on the personal medication record. A record of administration had been maintained on the MARs. Care plans were in place for the management of distressed reactions and there was evidence that they were regularly reviewed.

Pain management medicines are prescribed as necessary and when administered their effect is monitored to ensure that they provide relief and that the resident is comfortable. The records of two patients who are prescribed medicines for the management of pain were reviewed. The names of the medicines and the parameters for administration had been recorded on the personal medication records. The administration had been recorded on the MARs. Both patients had a care plan in place which detailed the management of the patient’s pain. The registered manager stated that the care plan is evaluated monthly. The registered manager advised that a pain assessment is completed at least monthly or more often if necessary.

Some patients are prescribed buccal midazolam for the management of epilepsy. There was an Epilepsy Management Plan in place for each patient.

Areas for Improvement

The registered manager advised that bisphosphonate medicines are administered in accordance with the manufacturers’ instructions; however, they are recorded as being administered at the same time as the other morning medicines. The time recorded for the administration of bisphosphonate medicines should be accurately recorded. This recommendation was restated.

The registered manager advised that controlled drugs are denatured prior to disposal. A record should be made that this has been done. This was discussed with the registered manager.

The reason for and outcome of administering medicines for the management of distressed reactions should be recorded. A recommendation was made.

Number of Requirements	0	Number of Recommendations	2
-------------------------------	----------	----------------------------------	----------

5.4 Additional Areas Examined

Medicines were safely and securely stored in accordance with the manufacturers’ instructions.

6. Quality Improvement Plan

The issue(s) identified during this inspection are detailed in the QIP. Details of this QIP were discussed with Ms Donna Mawhinney, Registered Manager, as part of the inspection process. The timescales commence from the date of inspection.

The registered person/manager should note that failure to comply with regulations may lead to further enforcement action including possible prosecution for offences. It is the responsibility of the registered person/manager to ensure that all requirements and recommendations contained within the QIP are addressed within the specified timescales.

Matters to be addressed as a result of this inspection are set in the context of the current registration of your premises. The registration is not transferable so that in the event of any future application to alter, extend or to sell the premises, the RQIA would apply standards current at the time of that application.

6.1 Statutory Requirements

This section outlines the actions which must be taken so that the registered person/s meets legislative requirements based on The HPSS (Quality, Improvement and Regulation) (Northern Ireland) Order 2003, and The Nursing Homes Regulations (Northern Ireland) 2005

6.2 Recommendations

This section outlines the recommended actions based on research, recognised sources and the Department of Health, Social Services and Public Safety (DHSSPS) Care Standards for Nursing Homes (2015). They promote current good practice and if adopted by the registered person, it may enhance service, quality and delivery.

6.3 Actions Taken by the Registered Manager/Registered Person

The QIP should be completed by the registered manager/registered person and detail the actions taken to address the recommendations stated. The registered person will review and approve the QIP to confirm that these actions have been completed. Once fully completed, the QIP will be returned to pharmacists@rqia.org.uk and assessed by the inspector.

It should be noted that this inspection report should not be regarded as a comprehensive review of all strengths and weaknesses that exist in the home. The findings set out are only those which came to the attention of RQIA during the course of this inspection. The findings contained within this report do not absolve the registered person/manager from their responsibility for maintaining compliance with minimum standards and regulations. It is expected that the requirements and recommendations set out in this report will provide the registered person/manager with the necessary information to assist them in fulfilling their responsibilities and enhance practice within the home.

Quality Improvement Plan			
Recommendations			
Recommendation 1 Ref: Standard 29 Stated: Second time To be Completed by: 17 May 2015	The time recorded for the administration of bisphosphonate medicines should be accurately recorded.		
	Response by Registered Person(s) Detailing the Actions Taken: The time will be recorded accurately as detailed on the prescription sheet and the recording sheet.		
Recommendation 1 Ref: Standard 26 Stated: First time To be Completed by: 17 May 2015	It is recommended that the registered person should ensure that the reason for, and outcome of administering medicines for the management of distressed reactions is recorded.		
	Response by Registered Person(s) Detailing the Actions Taken: The reason and outcome of administering medicines for the management of distressed reactions will be recorded on the Mars sheet and the care plan.		
Registered Manager Completing QIP	DONNA MAWHINNEY	Date Completed	01/06/15
Registered Person Approving QIP	Dr Claire Royston	Date Approved	19.06.15
RQIA Inspector Assessing Response		Date Approved
