Announced Care Inspection Report
14 July 2016

Clements Dental Care

Type of Service: Independent Hospital (IH) - Dental Treatment
Address: 22 West Street, Carrickfergus BT38 7AR
Tel No: 028 93368777
Inspector: Carmel McKeegan

www.rqia.org.uk
Assurance, Challenge and Improvement in Health and Social Care
1.0 Summary

An announced inspection of Clements Dental Care took place on 14 July 2016 from 10:00 to 12:30.

The inspection sought to assess progress with any issues raised during and since the previous inspection and to determine if the service was delivering safe, effective and compassionate care and if the service was well led.

Is care safe?

Observations made, review of documentation and discussion with Mr Michael Clements, Registered Person, and staff demonstrated that systems and processes were in place to ensure that care to patients was safe and avoids and prevents harm. Areas reviewed included staffing, recruitment and selection, safeguarding, management of medical emergencies, infection prevention control and decontamination, radiology and the general environment. One recommendation was made in relation to the decontamination of dental handpieces.

Is care effective?

Observations made, review of documentation and discussion with Mr Clements and staff demonstrated that systems and processes were in place to ensure that care provided in the establishment was effective. Areas reviewed included clinical records, health promotion, audits and communication. No requirements or recommendations have been made.

Is care compassionate?

Observations made, review of documentation and discussion with Mr Clements and staff demonstrated that arrangements are in place to promote patients’ dignity, respect and involvement in decision making. No requirements or recommendations have been made.

Is the service well led?

Information gathered during the inspection evidenced that there was effective leadership and governance arrangements in place which creates a culture focused on the needs of patients in order to deliver safe, effective and compassionate care. Areas reviewed included organisational and staff working arrangements, the arrangements for policy and risk assessment reviews, the arrangements for dealing with complaints, incidents and alerts, insurance arrangements and the registered provider’s understanding of their role and responsibility in accordance with legislation. No requirements or recommendations have been made.

This inspection was underpinned by The Independent Health Care Regulations (Northern Ireland) 2005, The Regulation and Improvement Authority (Independent Health Care) (Fees and Frequency of Inspections) (Amendment) Regulations (Northern Ireland) 2011 and the Department of Health, Social Services and Public Safety (DHSSPS) Minimum Standards for Dental Care and Treatment (2011).

While we assess the quality of services provided against regulations and associated DHSSPS care standards, we do not assess the quality of dentistry provided by individual dentists.
1.1 Inspection outcome

| Total number of requirements and recommendations made at this inspection |
|---|---|
| Requirements | Recommendations |
| 0 | 1 |

Detail of the Quality Improvement Plan (QIP) within was discussed with Mr Michael Clements, Registered Person, as part of the inspection process. The timescales for completion commence from the date of inspection.

Enforcement action did not result from the findings of this inspection.

1.2 Actions/enforcement taken following the most recent care inspection

There were no further actions required to be taken following the most recent inspection.

3.0 Methods/processes

Questionnaires were provided to patients and staff prior to the inspection by the practice on behalf of the RQIA. The following records were also analysed: staffing information, complaints declaration and returned completed patient and staff questionnaires.

During the inspection the inspector met with Mr Clements, Registered Person, the practice manager and a dental nurse. A tour of the premises was also undertaken.
Records were examined during the inspection in relation to the following areas:

- staffing
- recruitment and selection
- safeguarding
- management of medical emergencies
- infection prevention and control
- radiography
- clinical record recording arrangements
- health promotion
- management and governance arrangements
- maintenance arrangements

4.0 The inspection

4.1 Review of requirements and recommendations from the most recent inspection dated 28 May 2015

The most recent inspection of the establishment was an announced care inspection. No requirements or recommendations were made during this inspection.

4.2 Review of requirements and recommendations from the last care inspection dated 28 May 2015

As above.

4.3 Is care safe?

Staffing

Three dental surgeries are in operation in this practice. Discussion with staff and a review of completed patient and staff questionnaires demonstrated that there was sufficient numbers of staff in various roles to fulfil the needs of the practice and patients.

Induction programme templates were in place relevant to specific roles and responsibilities. A sample of three evidenced that induction programmes had been completed when new staff joined the practice.

Procedures were in place for appraising staff performance and staff confirmed that appraisals had taken place. Staff confirmed that they felt supported and involved in discussions about their personal development. There was a system in place to ensure that all staff receive appropriate training to fulfil the duties of their role.

A review of records confirmed that a robust system was in place to review the General Dental Council (GDC) registration status and professional indemnity of all clinical staff.
Recruitment and selection

A review of the submitted staffing information and discussion with Mr Clements confirmed that three new staff members have been recruited since the previous inspection. A review of the personnel files for these staff demonstrated that all the relevant information as outlined in Schedule 2 of The Independent Health Care Regulations (Northern Ireland) 2005 has been sought and retained.

There was a recruitment policy and procedure available. The policy was comprehensive and reflected best practice guidance.

Safeguarding

Staff spoken with were aware of the types and indicators of abuse and the actions to be taken in the event of a safeguarding issue being identified, including who the nominated safeguarding lead was.

Review of records demonstrated that all staff had received training in safeguarding children and adults as outlined in the Minimum Standards for Dental Care and Treatment 2011. A copy of the new regional guidance issued in July 2015 entitled ‘Adult Safeguarding Prevention and Protection in Partnership’ was available in the practice for staff reference and staff confirmed this new guidance document had been included in a recent practice meeting.

Policies and procedures were in place for the safeguarding and protection of adults and children. The policy included the types and indicators of abuse and distinct referral pathways in the event of a safeguarding issue arising with an adult or child. The relevant contact details for onward referral to the local Health and Social Care Trust should a safeguarding issue arise were included. Mr Clements confirmed that the practice’s policy for safeguarding adults will be updated in keeping with the new regional guidance.

Management of medical emergencies

A review of medical emergency arrangements evidenced that emergency medicines were provided in keeping with the British National Formulary (BNF), and that emergency equipment as recommended by the Resuscitation Council (UK) guidelines was retained. A robust system was in place to ensure that emergency medicines and equipment do not exceed their expiry date. There was an identified individual with responsibility for checking emergency medicines and equipment.

Review of training records and discussion with staff confirmed that the management of medical emergencies is included in the induction programme and training is updated on an annual basis in keeping with best practice guidance.

Discussion with staff demonstrated that they have a good understanding of the actions to be taken in the event of a medical emergency and the location of medical emergency medicines and equipment.

The policy for the management of medical emergencies reflected best practice guidance. Protocols were available for staff reference outlining the local procedure for dealing with the various medical emergencies.
Infection prevention control and decontamination procedures

Clinical and decontamination areas were tidy and uncluttered and work surfaces were intact and easy to clean. Fixtures, fittings, dental chairs and equipment were free from damage, dust and visible dirt. Staff were observed to be adhering to best practice in terms of uniform and hand hygiene policies.

Discussion with staff demonstrated that they had an understanding of infection prevention and control policies and procedures and were aware of their roles and responsibilities. Staff confirmed that they have received training in infection prevention and control and decontamination in keeping with best practice.

There was a nominated lead who had responsibility for infection control and decontamination in the practice.

A decontamination room, separate from patient treatment areas and dedicated to the decontamination process, was available. Appropriate equipment, including a washer disinfector and two steam sterilisers have been provided to meet the practice requirements. A review of documentation evidenced that equipment used in the decontamination process has been appropriately validated. A review of equipment logbooks evidenced that periodic tests are undertaken and, in the main, recorded in keeping with Health Technical Memorandum (HTM) 01-05 Decontamination in primary care dental practices. It was observed that the automatic control test (ACT) for the sterilisers was not consistently recorded in the relevant log books, this was discussed with Mr Clements who confirmed that the relevant logbooks would be marked up to date that day. Mr Clements also stated this would be communicated to all nurses to ensure the ACT is documented daily.

Discussion with staff evidenced that arrangements are in place to ensure that reusable dental instruments are appropriately cleaned, sterilised and stored following use in keeping with best practice guidance as outlined in HTM 01-05, with the exception of dental handpieces which are manually cleaned prior to sterilisation. Processing of hand pieces was discussed with Mr Clements who was advised to refer to the Professional Estates Letter (PEL) (13)13, dated 24 March 2015 which was issued to all dental practices by the DHSSPS. A recommendation has been made to review the procedure for the decontamination of dental handpieces.

It was confirmed that the practice continues to audit compliance with HTM 01-05 six monthly using the Infection Prevention Society (IPS) audit tool.

A range of policies and procedures were in place in relation to decontamination and infection prevention and control.

Radiography

The practice has three surgeries, each of which has an intra-oral x-ray machine.

A dedicated radiation protection file containing the relevant local rules, employer’s procedures and other additional information was retained. A review of the file confirmed that staff have been authorised by the radiation protection supervisor (RPS) for their relevant duties and have received local training in relation to these duties. It was evidenced that all measures are taken to optimise dose exposure. This included the use of rectangular collimation, x-ray audits and digital x-ray processing.
A copy of the local rules was on display near each x-ray machine and appropriate staff had signed to confirm that they had read and understood these. Staff spoken with demonstrated sound knowledge of the local rules and associated practice.

The radiation protection advisor (RPA) completes a quality assurance check every three years. Review of the report of the most recent visit by the RPA demonstrated that the recommendations made have been addressed.

The x-ray equipment has been serviced and maintained in accordance with manufacturer's instructions.

Quality assurance systems and processes were in place to ensure that all matters relating to x-rays reflect legislative and best practice guidance.

**Environment**

The environment was maintained to a fair standard of maintenance and décor. Mr Clements advised that the practice may be extending and would redecorate the practice at that time. Mr Clements was advised to contact the RQIA registration team to request an application for variation of registration regarding the possible practice extension.

Detailed cleaning schedules were in place for all areas which were signed on completion. A colour coded cleaning system was in place.

Arrangements are in place for maintaining the environment. A general health and safety risk assessment had been undertaken and an emergency and business continuity plan was available for staff in the event of a power failure or other such event. This is good practice.

A legionella risk assessment was last undertaken on 14 June 2016 and water temperatures are monitored and recorded as recommended.

A fire risk assessment had been undertaken and staff confirmed fire training and fire drills had been completed. Staff demonstrated that they were aware of the action to take in the event of a fire.

A written scheme of examination of pressure vessels was in place, the most recent examination was undertaken on 29 June 2016.

**Patient and staff views**

Eighteen patients submitted questionnaire responses to RQIA. All indicated that they felt safe and protected from harm. Comments provided included the following:

- “All the staff and treatment is excellent”
- “There is enough staff available when needed. They are helpful and easy to talk to”
- “Yes all staff make me feel you feel very welcome and at ease”
Seven staff submitted questionnaire responses. All indicated that they felt that patients are safe and protected from harm. Staff spoken with during the inspection concurred with this. Comments provided included the following:

- “Yes, I do feel the patients are safe and protected from harm”
- “A lot of time has been spent by ….. to update the practice to a high standard”
- “Practice and working staff are well trained, very well maintained building and policies in place and implemented.”

**Areas for improvement**

The procedure for the decontamination of dental handpieces should be reviewed.

| Number of requirements | 0 | Number of recommendations: | 1 |

### 4.4 Is care effective?

**Clinical records**

Staff spoken with confirmed that clinical records are updated contemporaneously during each patient’s treatment session in accordance with best practice.

Routine dental examinations include a review of medical history, a check for gum disease and oral cancers and that treatment plans are developed in consultation with patients. It was confirmed that patients are informed about the cost of treatments, choices and options.

Both manual and computerised records are maintained. Electronic records have different levels of access afforded to staff dependent on their role and responsibilities. Appropriate systems and processes were in place for the management of records and maintaining patient confidentiality.

Policies were available in relation to records management, data protection and confidentiality and consent. The records management policy includes the arrangements in regards to the creation, storage, recording, retention and disposal of records and data protection. The policy is in keeping with legislation and best practice guidance.

The practice is registered with the Information Commissioner’s Office (ICO) and a Freedom of Information Publication Scheme has been established.

**Health promotion**

The practice has a strategy for the promotion of oral health and hygiene. A dental hygienist also works in the practice and Mr Clements confirmed that oral health is actively promoted on an individual level with patients during their consultations and that samples of toothpaste and mouth wash are given to patients.

A range of oral health promotion leaflets were available at reception and the patients’ waiting area. A range of oral healthcare products were also available to purchase.
Audits

There were arrangements in place to monitor, audit and review the effectiveness and quality of care delivered to patients at appropriate intervals which included:

- x-ray quality grading
- x-ray justification and clinical evaluation recording
- IPS HTM 01-05 compliance
- clinical waste management
- clinical records
- review of complaints/accidents/incidents

The practice is a training practice approved by the Northern Ireland Medical and Dental Training Agency (NIMDTA). A dental foundation year one (DF1) trainee is undergoing a current placement in the practice.

Communication

Mr Clements confirmed that arrangements are in place for onward referral in respect of specialist treatments. A policy and procedure and template referral letters have been established.

Staff meetings are held on a regular basis to discuss clinical and practice management issues. Review of documentation demonstrated that minutes of staff meetings are retained. Staff spoken with confirmed that meetings also facilitated informal in house training sessions.

Staff confirmed that there are good working relationships and there is an open and transparent culture within the practice.

A breaking bad news policy in respect of dentistry was in place.

Patient and staff views

All of the 18 patients who submitted questionnaire responses indicated that they get the right care, at the right time and with the best outcome for them. Comments provided included the following:

- “Excellent service”
- “I understand the care I am receiving and I am part of it “
- “Number one care every time”

All seven submitted staff questionnaire responses indicated that they felt that patients get the right care, at the right time and with the best outcome for them. Staff spoken with during the inspection concurred with this. Comments provided included the following:

- “Yes, very much”
- “Clinical records are fully written up. Audits in place to maintain clinical effectiveness”
Areas for improvement

No areas for improvement were identified during the inspection.

| Number of requirements | 0         | Number of recommendations: | 0         |

4.5 Is care compassionate?

Dignity, respect and involvement in decision making

Staff spoken with demonstrated a good understanding of the core values of privacy, dignity, respect and patient choice. Staff confirmed that if they needed to speak privately with a patient that arrangements are provided to ensure the patient’s privacy is respected. Staff were observed to converse with patients and conduct telephone enquiries in a professional and confidential manner.

The importance of emotional support needed when delivering care to patients who were very nervous or fearful of dental treatment was clear.

It was confirmed that treatment options, including the risks and benefits, were discussed with each patient. This ensured patients understood what treatment is available to them and can make an informed choice. Staff demonstrated how consent would be obtained.

Review of submitted questionnaires from patients demonstrated a high level of satisfaction with the systems of communication operating in the dental practice, comments provided by patients complimented service delivery within the practice.

The practice undertakes patient satisfaction surveys on an annual basis. Review of the most recent patient satisfaction report demonstrated that the practice pro-actively seeks the views of patients about the quality of treatment and other services provided. Patient feedback whether constructive or critical, is used by the practice to improve, as appropriate.

A policy and procedure was in place in relation to confidentiality which included the arrangements for respecting patient’s privacy, dignity and providing compassionate care and treatment.

Patient and staff views

All of the 18 patients who submitted questionnaire responses indicated that they are treated with dignity and respect and are involved in decision making affecting their care. Comments provided included the following:

- “Lovely friendly staff and bright practice”
- “Treated with dignity and respect every time”
All seven staff questionnaire responses indicated that they felt that patients are treated with dignity and respect and are involved in decision making affecting their care. Staff spoken with during the inspection concurred with this. The following comment was provided:

- “All patients and staff are treated well and respected fully. All information is stored and regarded as confidential at all times”

**Areas for improvement**

No areas for improvement were identified during the inspection.

**4.6 Is the service well led?**

**Management and governance arrangements**

There was a clear organisational structure within the practice and staff were able to describe their roles and responsibilities and were aware of who to speak to if they had a concern. Staff confirmed that there were good working relationships and that management were responsive to any suggestions or concerns raised. There was a nominated individual with overall responsibility for the day to day management of the practice.

Policies and procedures were available for staff reference. Observations made confirmed that policies and procedures were indexed, dated and systematically reviewed on a three yearly basis. Staff spoken with were aware of the policies and how to access them.

Arrangements were in place to review risk assessments.

A copy of the complaints procedure was available in the practice. Staff demonstrated a good awareness of complaints management. A complaints questionnaire was forwarded by RQIA to the practice for completion. The returned questionnaire indicated that no complaints have been received for the period 1 April 2015 to 31 March 2016.

A system was in place to ensure that notifiable events were investigated and reported to RQIA or other relevant bodies as appropriate. A system was also in place to ensure that urgent communications, safety alerts and notices are reviewed and where appropriate, made available to key staff in a timely manner.

Mr Clements confirmed that arrangements were in place to monitor, audit and review the effectiveness and quality of care delivered to patients at appropriate intervals. If required an action plan is developed and embedded into practice to address any shortfalls identified during the audit process.

A whistleblowing/raising concerns policy was available. Discussion with staff confirmed that they were aware of who to contact if they had a concern.

It was confirmed that the Statement of Purpose and Patient’s Guide are kept under review, revised and updated when necessary and available on request.

The RQIA certificate of registration was up to date and displayed appropriately.
Observation of insurance documentation confirmed that current insurance policies were in place.

Mr Clements demonstrated a clear understanding of his role and responsibility in accordance with legislation. Information requested by RQIA has generally been submitted within specified timeframes.

**Patient and staff views**

All of the 18 patients who submitted questionnaire responses indicated that they felt that the service is well managed. Comments provided included the following:

- “Brilliant”
- “I am informed when any changes are being made. The staff within the dental surgery provide good quality care at all times”
- “A1 service, great staff.”

All seven submitted staff questionnaire responses indicated that they felt that the service is well led. Staff spoken with during the inspection concurred with this. The following comment was provided:

- “Well led team, this is a great practice”

**Areas for improvement**

No areas for improvement were identified during the inspection.

| Number of requirements | 0 | Number of recommendations: | 0 |

**5.0 Quality improvement plan**

Any issues identified during this inspection are detailed in the QIP. Details of this QIP were discussed with Mr Michael Clements, Registered Person, as part of the inspection process. The timescales commence from the date of inspection.

The registered provider/manager should note that failure to comply with regulations may lead to further enforcement action including possible prosecution for offences. It is the responsibility of the registered provider to ensure that all requirements and recommendations contained within the QIP are addressed within the specified timescales.

Matters to be addressed as a result of this inspection are set in the context of the current registration of the dental practice. The registration is not transferable so that in the event of any future application to alter, extend or to sell the premises, RQIA would apply standards current at the time of that application.
This section outlines the actions which must be taken so that the registered provider meets legislative requirements based on The Independent Health Care Regulations (Northern Ireland) 2005.

5.2 Recommendations

This section outlines the recommended actions based on research, recognised sources and DHSSPS Minimum Standards for Dental Care and Treatment (2011). They promote current good practice and if adopted by the registered provider may enhance service, quality and delivery.

5.3 Actions taken by the registered provider

The QIP should be completed and detail the actions taken to meet the legislative requirements stated. The registered provider should confirm that these actions have been completed and return completed QIP to independant.healthcare@rqia.org.uk for review by the inspector.

It should be noted that this inspection report should not be regarded as a comprehensive review of all strengths and areas for improvement that exist in the service. The findings reported on are those which came to the attention of RQIA during the course of this inspection. The findings contained within this report do not exempt the registered provider from their responsibility for maintaining compliance with the regulations and standards. It is expected that the requirements and recommendations outlined in this report will provide the registered provider with the necessary information to assist them to fulfil their responsibilities and enhance practice within the service.

The procedure for the decontamination of dental handpieces should be reviewed to ensure that they are decontaminated in keeping with manufacturer’s instructions and Professional Estates Letter (PEL) (13) 13. Compatible handpieces should be processed in the washer disinfector.

**Response by registered provider detailing the actions taken:**
Following our recent inspection by RQIA, we have changed our process for handpiece decontamination in our Local Decontamination Unit. Handpieces which are indicated to be safe to process in a washer disinfector (according to manufacturers instructions), are now put through a cycle in the washer disinfect prior to processing in the vacuum autoclave. Handpieces which are not recommended for cleaning in a washer disinfector (according to manufacturers instructions) are cleaned manually and then processed in the vacuum autoclave. This ensures that our dental practice follows HTM 01-05 recommendations and that we continue to follow best practice guidance.
